

Quantum Day is Coming. Ensure You're Protected Today.

Meet Isidore Quantum® - the quantum-resistant encryption device designed for secure communications from the factory floor to the forward edge of operations.

- **CNSA 2.0-Compliant:** delivers post-quantum resilience for government and commercial networks
- **Seamless Integration:** drop-in devices are protocol, network and end-device agnostic
- **COTS-Based:** 100% commercial off-the-shelf hardware is cost-effective, scalable, and exportable
- **Zero-trust by Design:** hardware-enforced separation reduces risk
- **Automated Rekeying:** significantly reduces the cost and cognitive load for management teams
- **Field-proven form factors:** deployed today in land, sea, air and space

Isidore Quantum provides quantum-resistant security for your networks, protecting you from threats of tomorrow.
